

PRESS RELEASE

ARTS Asset Management starts with a new sales structure

Vienna, February 22, 2019. As part of the simplification of the structure of C-QUADRAT Investment Group, ARTS Asset Management GmbH is reorganizing itself. Since autumn 2018, ARTS has also been active in sales as a separate brand - with the previous employees of C-QUADRAT Wealth Management GmbH.

There have also been changes in the sales structure. Gunther Pahl, who has held various sales positions within the C-Quadrat Group since 2004, was appointed as Head of Sales, Europe in February 2019. Mr. Pahl, previously Head of Sales Austria and CEE, will expand his area of responsibility. In the future he will also take over the sales management and development for Germany and continue to report directly to the management board. Following the personnel changes in the sales department in Germany, Mr. Pahl will also be entrusted with setting up a new sales team for Germany.

Thomas Rieß, Managing Director of ARTS Asset Management, said: "With Gunther Pahl, we have a sales expert on board with many years of experience who understands the challenges of the market and the needs of our clients very well. With his expertise, we will restructure our sales activities in Germany and expand them throughout Europe."

ARTS Asset Management, based in Vienna and St. Pölten, is part of the C-Quadrat Investment Group and is specialized in managing quantitative total return strategies. A self-developed, technical trading system forms the basis for active fund management, in which all investment decisions are made free of human emotions. The core strength of the products lies in the combination of their medium-term trend following orientation and the permanent adjustment of the portfolio to the respective development of the individual markets with the aim of limiting losses through active risk management in order to generate positive returns in the long term. Over the past 16 years, the ARTS funds have received over 300 international awards. ARTS is currently managing around EUR 2.2 billion in 16 flexibly managed funds and operates in several countries.
